Live Website Functional QA & QC Evaluation Report

Target Website: https://edselrenz.github.io/Itinerary-App/welcome • Scope: End-to-End Live Browser Verification & Regression Audit • Date: November 2, 2026

QA Evaluation Parameter	Verified Live Website Status
Target Live URL	https://edselrenz.github.io/Itinerary-App/welcome
Evaluation Scope	Live Website-Only Inspection, Interactive Functional QA, Regression Verification of Prior Defects, UX/Accessibility Audit, and SPA Persistence Testing
QA Test Suite Summary	**28 Total Website Test Cases:** 25 Passed (89.3%), 0 Failed (0.0%), 2 Partially Passed (7.1%), 1 Not Tested (3.6% — Live account DB write skipped per Rule 11)
Previously Reported Website Issues Verified Fixed	• **DEF-02 & DEF-08 Fixed:** Social sign-in buttons (*Continue with Google*, *Continue with Apple*) are now properly disabled/greyed-out on `/login` and `/signup`. • **DEF-03 Fixed (Ordering):** Suggested Itinerary Day 1 & Day 2 stops now sort chronologically with overnight stays (*La Casa Prime Cabins*, `1 Night · 2 Days`) placed at the end of Day 1. • **DEF-06 Fixed:** *Casa Batik* no longer appears under `Nearby → Stores`; actual retail/convenience stores are displayed. • **DEF-09 Fixed:** Custom map marker pins now include `role="button"`, `tabindex`, and `aria-label` attributes.
Overall Website Verdict	**ACCEPTABLE (With 3 Minor Low-Severity UX/Copy Polish Items)** — All core and secondary website workflows operate reliably in live browser testing.

A. Executive Summary

A dedicated, browser-driven Quality Assurance (QA) and Quality Control (QC) re-evaluation was executed exclusively against the deployed GitHub Pages web application at https://edselrenz.github.io/Itinerary-App/welcome. Every accessible route, modal, form, search filter, interactive map control, itinerary generator step, custom timeline builder action, and local storage persistence path was actively exercised in the live browser.

Compared to the earlier baseline build, the newly deployed website resolves all major frontend functional and UX defects identified in the prior audit. Specifically, unconfigured third-party OAuth buttons (*Continue with Google* and *Continue with Apple*) are now properly disabled on both `/login` and `/signup`; the Suggested Itinerary Wizard now orders daily stops chronologically and places overnight accommodations (*La Casa Prime Cabins*, `1 Night · 2 Days`) at the end of the day; the `Nearby → Stores` tab now surfaces genuine convenience and retail stores (such as *J&B- Convenience Store* and *Alfamart General Tinio*) instead of cultural museum *Casa Batik*; and custom Leaflet marker pins now expose keyboard and screen-reader accessibility attributes (`role="button"`, `tabindex`, `aria-label`). Only three minor, low-severity UX/copy polish observations remain.

B. Live Website Inspection & Walkthrough by Screen

1. Welcome, Login, Sign Up & Guest Onboarding Views

- **Welcome View (https://edselrenz.github.io/Itinerary-App/welcome):** Loads cleanly after the animated splash screen dismisses. Renders the top branding *"✈ Trip mo, trip ko"*, headline *"Your next adventure is waiting."*, subtitle *"Get personalized itineraries, easy commutes, and nearby essentials."*, and three well-aligned action buttons: `LOG IN`, `SIGN UP`, and `Continue as Guest` above a city skyline vector illustration.

- **Login View (https://edselrenz.github.io/Itinerary-App/login) & Sign Up View (https://edselrenz.github.io/Itinerary-App/signup):** Both forms enforce reactive input validation (disabling the primary submit button when required fields are empty, email format is invalid, password is under 8 characters, or confirmation password does not match). Both screens render password visibility eye toggles and properly disable the *"Continue with Google"* and *"Continue with Apple"* buttons.
- **Guest Onboarding View (https://edselrenz.github.io/Itinerary-App/guest):** Displays *"Explore as a guest"* with primary CTA `CONTINUE AS GUEST` and secondary CTA `Create an Account`. Note: The descriptive text states *"Your data won't be saved"*, whereas the app actually saves Guest trips locally on the device (and states on `/tabs/profile`: *"Your created itineraries and preferences are saved only on this device"*).

2. Home Tab Discovery, Search, Category Filters & Place Detail Modal

- **Destination Catalog & Cards (https://edselrenz.github.io/Itinerary-App/tabs/home):** Displays action cards for **Suggested Itinerary** and **Custom Itinerary** alongside destination cards including *Rohi Paperflower Cafe* (Bongabon, Cafe & Dining, ₱150–₱350), *Museo de Bongabon* (Bongabon, Culture & Museum), *Thornes Samgyupsal House* (Bongabon, Restaurant & Dining, ₱399–₱599), *La Casa Prime Cabins* (Bongabon, Resort & Stay, ₱2,500/night), *Minalungao National Park* (General Tinio), *Casa Batik* (Cabanatuan City, ₱100–₱300), and *Tagpuan sa Lumang Gapan* (Gapan City).
- **Search Bar Verification:**
  - Place-name queries: `"Rohi"` → 1 match (*Rohi Paperflower Cafe*); `"Museo"` → 1 match (*Museo de Bongabon*); `"Minalungao"` → 1 match (*Minalungao National Park*).
  - Municipality queries: `"Bongabon"` → 5 matches (*Rohi Paperflower Cafe*, *Museo de Bongabon*, *Thornes Samgyupsal House*, *La Casa Prime Cabins*, *D' Pavilion Farm and Resort*); `"Gapan"` → 1 match (*Tagpuan sa Lumang Gapan*); `"Cabanatuan"` → 1 match (*Casa Batik*).
  - Non-existent query: `"xyz999none"` → 0 matches with clean empty state (*"No destinations found."*) and working `Clear Search` / `X` reset button.
- **Place Detail Modal & Route Handoff:** Clicking any destination card opens a modal displaying high-resolution imagery, category badge, municipality, operating hours, price range, description, tags, `Open in Google Maps`, and `PLAN ROUTE HERE`. Clicking `PLAN ROUTE HERE` on *Casa Batik* navigated directly to `/tabs/map?destination=Casa%20Batik&municipality=Cabanatuan%20City&lat=15.4850&lng=120.9680`, centered the map on those coordinates, and opened the bottom place detail card.

3. Interactive Map Tab (https://edselrenz.github.io/Itinerary-App/tabs/map)

- **Leaflet Map & Category Filter Pills:** Renders OpenStreetMap tiles over Nueva Ecija with custom colored pin markers. Clicking category pills (*All Places*, *Nature & Parks*, *Cafes & Coffee*, *Tourist Spots*, etc.) dynamically filters active pins on the canvas.
- **Marker Accessibility & Controls:** Custom marker DOM elements include `role="button"`, `tabindex`, and `aria-label` attributes. Clicking a marker opens the bottom preview card; zoom (`+`/`-`) and recenter map buttons operate smoothly.

4. Suggested Itinerary Wizard (https://edselrenz.github.io/Itinerary-App/suggested-wizard)

- **Chronology Verification (Step 3):** Generating a 2-day Nueva Ecija itinerary with budget ₱2,500/day and preferences (*Food Trip, Culture & History, Nature & Parks, Resort*) produced:
  - **Day 1 (Bongabon):** Stop 1: *Rohi Paperflower Cafe* (`12:00 PM - 2:00 PM`, 2 hrs) → Stop 2: *Museo de Bongabon* (`2:00 PM - 5:00 PM`, 3 hrs) → Stop 3: *Thornes Samgyupsal House* (`5:00 PM - 7:00 PM`, 2 hrs) → Stop 4: *La Casa Prime Cabins* (`1 Night · 2 Days`, Overnight stay placed at the end of Day 1).
  - **Day 2 (San Jose / Cabanatuan Cluster):** Stop 1: *Farm Villaronte* (`09:00 AM - 11:00 AM`, 2 hrs) → Stop 2: *Casa Batik* (`10:30 AM - 12:30 PM`, 2 hrs) → Stop 3: *D' Pavilion Farm and Resort* (`11:30 AM - 1:30`

PM, 2 hrs). Note: While sorted by start time, Day 2's static time labels overlap by 30–60 minutes (`WQA-02`).

- **Nearby Essentials View:** Switching to the Nearby toggle accurately categorized local essentials:
  - **Restaurants:** *Boss Samgyupsal*, *Lomi-Raiyah Foodhouse*, *The Hangover by Y3-J*, *Banchan Gogi Unlimited Korean Grill*, *Tara G!*, *Hera's Diner*.
  - **Hospital & Pharmacies:** *General Tinio District Hospital*, *PharmVille Pharmacy*, *Deb Pharmacy*, *Resma Medical Clinic*.
  - **Stores:** *J&B- Convenience Store*, *Rc Sylvia Store*, *Maila Store*, *Alfamart General Tinio*, *M2 Mc. Oil*, *Franks N' Burgers* (confirming *Casa Batik* was removed from Stores).

5. Custom Itinerary Builder, Saved Itineraries & Profile Tabs

- **Custom Builder & Detail Editor (https://edselrenz.github.io/Itinerary-App/custom-builder):** Enforces title and budget validation, supports adding places from the catalog or off-grid custom venues, dynamically computes `VERIFIED ESTIMATED COSTS` (e.g., `₱549 - ₱949 (+ 1 unpriced stop)` for 3 stops, updating to `₱150 - ₱350 (+ 1 unpriced stop)` when *Thornes Samgyupsal House* is removed), reorders stops via up/down arrows, and saves trips with toast feedback.
- **Saved Itineraries Tab (https://edselrenz.github.io/Itinerary-App/tabs/history):** Lists all saved Custom and Suggested trips, opens trips in the full builder/detail view on click, and prompts confirmation before deleting a trip.
- **Profile Tab (https://edselrenz.github.io/Itinerary-App/tabs/profile):** Displays *"Guest Traveler"* status, local-only storage explanation, and working `LOG IN TO SYNC` and `CREATE ACCOUNT` buttons.

C. Complete Website QA Test Execution Matrix (28 Test Cases)

Test ID & Module	Test Scenario, Preconditions & Test Steps	Expected Result, Actual Result & Evidence	Status & Severity
WTC-01 Welcome & Splash	**Scenario:** Initial load of https://edselrenz.github.io/Itinerary-App/welcome and splash dismissal. **Preconditions & Steps:** Open URL in browser; observe splash overlay and Welcome screen.	**Expected:** Splash dismisses cleanly revealing *"Trip mo, trip ko"* and 3 onboarding buttons. **Actual & Evidence:** Rendered headline, skyline graphic, and `LOG IN`, `SIGN UP`, `Continue as Guest` buttons.	**PASS** Low
WTC-02 Guest Onboarding	**Scenario:** Navigate from `/welcome` to `/guest` and enter Guest Mode. **Preconditions & Steps:** Click `Continue as Guest` on `/welcome`, then click `CONTINUE AS GUEST` on `/guest`.	**Expected:** Navigates to `/tabs/home` with Guest session active. **Actual & Evidence:** Transitioned to `/tabs/home`; note minor copy discrepancy on `/guest` saying *"Your data won't be saved"* (WQA-01).	**PARTIAL** Low (WQA-01)
WTC-03 Login Screen UI	**Scenario:** Inspect `/login` inputs, validation, and social sign-in button states. **Preconditions & Steps:** From `/welcome`, click `LOG IN`; inspect form controls and buttons.	**Expected:** Email/Password inputs, eye toggle, disabled submit when empty, and disabled unconfigured OAuth buttons. **Actual & Evidence:** Submit disabled when empty; *Continue with Google* and *Continue with Apple* are properly disabled/greyed-out.	**PASS** Medium

Test ID & Module	Test Scenario, Preconditions & Test Steps	Expected Result, Actual Result & Evidence	Status & Severity
WTC-04 Sign Up Screen UI	**Scenario:** Inspect `/signup` inputs, password validation, and social button states. **Preconditions & Steps:** Navigate to `/signup`; test empty/mismatched passwords and inspect OAuth buttons.	**Expected:** First Name, MI, Last Name, Email, Password, Confirm Password inputs; disabled OAuth buttons. **Actual & Evidence:** Validation enforced (≥8 chars & match); Google and Apple buttons properly disabled.	**PASS** Medium
WTC-05 Offline Banner Toggle	**Scenario:** Verify Offline Mode notification banner and close button. **Preconditions & Steps:** Observe top status bar when cloud sync is paused; click X close button.	**Expected:** Non-blocking banner states *"Offline Mode - Cloud sync paused..."* and closes on X. **Actual & Evidence:** Banner rendered cleanly without legacy `[Set Server]` prompt and dismissed on click.	**PASS** Medium
WTC-06 Home Search (Place Name)	**Scenario:** Search destinations by place name keywords on `/tabs/home`. **Preconditions & Steps:** Type `"Rohi"`, `"Museo"`, and `"Minalungao"` into Home search bar.	**Expected:** Each query returns the matching destination card. **Actual & Evidence:** Returned *Rohi Paperflower Cafe* (1), *Museo de Bongabon* (1), and *Minalungao National Park* (1).	**PASS** High
WTC-07 Home Search (Municipality)	**Scenario:** Search destinations by municipality name on `/tabs/home`. **Preconditions & Steps:** Type `"Bongabon"`, `"Gapan"`, and `"Cabanatuan"` into Home search bar.	**Expected:** Returns all places located in the queried municipality. **Actual & Evidence:** Returned 5 places for `"Bongabon"`, 1 place for `"Gapan"` (*Tagpuan sa Lumang Gapan*), and 1 place for `"Cabanatuan"` (*Casa Batik*).	**PASS** High
WTC-08 Home Search (Negative & Clear)	**Scenario:** Search non-existent keyword and reset search via Clear button. **Preconditions & Steps:** Enter `"xyz999none"`, verify empty state, then click X / `Clear Search`.	**Expected:** Displays *"No destinations found."* and restores full Home layout when cleared. **Actual & Evidence:** Empty state displayed cleanly and `Clear Search` restored all Home sections immediately.	**PASS** Medium
WTC-09 Home Category Pills	**Scenario:** Filter Home destinations using horizontal category pills. **Preconditions & Steps:** Click *All Places, Nature & Parks, Resorts & Pools, Restaurants, Cafes & Coffee, Museums*.	**Expected:** Updates active pill styling and filters destination cards by category. **Actual & Evidence:** All category pills filtered the displayed destination cards accurately.	**PASS** Medium
WTC-10 Place Detail Modal	**Scenario:** Open Place Detail modal from Home destination card. **Preconditions & Steps:** Click *Rohi Paperflower Cafe* card on `/tabs/home`; inspect fields and close via X.	**Expected:** Displays image, category badge, municipality, hours, price, description, tags, and route buttons. **Actual & Evidence:** Rendered `10:00 - 21:00`, `₱150 - ₱350`, tags, and closed cleanly via X.	**PASS** Medium
WTC-11 Plan Route Here Handoff	**Scenario:** Click `PLAN ROUTE HERE` inside Place Detail modal. **Preconditions & Steps:** Open *Casa Batik* detail modal on `/tabs/home` and click `PLAN ROUTE HERE`.	**Expected:** Navigates to `/tabs/map` with destination/lat/lng query params and focuses target pin. **Actual & Evidence:** Navigated to `/tabs/map?destination=Casa%20Batik&municipality=Cabanatuan%20City&lat=15.4850&lng=120.9680` and opened bottom place card.	**PASS** High

Test ID & Module	Test Scenario, Preconditions & Test Steps	Expected Result, Actual Result & Evidence	Status & Severity
WTC-12 Map Tab & Filter Pills	**Scenario:** Interactive Leaflet map rendering and category pill filtering on `/tabs/map`. **Preconditions & Steps:** Open Map tab; click *Nature & Parks* and *Cafes & Coffee* filter pills; test zoom and recenter buttons.	**Expected:** Map tiles and pins render; pills filter markers; recenter resets map bounds. **Actual & Evidence:** Pills highlighted blue and filtered pins; zoom and recenter buttons worked properly.	**PASS** High
WTC-13 Map Marker Accessibility	**Scenario:** Verify ARIA and keyboard attributes on custom map marker DOM elements (Regression for DEF-09). **Preconditions & Steps:** Inspect marker pin DOM elements on `/tabs/map` and click a pin.	**Expected:** Marker pins include `role="button"`, `tabindex`, and `aria-label`. **Actual & Evidence:** Confirmed presence of `role="button"`, `tabindex`, and `aria-label` on marker DOM nodes.	**PASS** Medium
WTC-14 Suggested Wizard Inputs	**Scenario:** Configure 2-day trip, budget (₱2,500), and preference tags in `/suggested-wizard`. **Preconditions & Steps:** Select 2 days, budget ₱2,500, tags *Food Trip, Culture & History, Nature & Parks, Resort*; click `Find Itinerary`.	**Expected:** Validates inputs and generates a 2-day geographically clustered itinerary. **Actual & Evidence:** Generated 2-day plan (Day 1 Bongabon, Day 2 San Jose / Cabanatuan cluster).	**PASS** High
WTC-15 Suggested Wizard Chronology (Day 1)	**Scenario:** Verify chronological stop ordering and overnight stay placement on Day 1 (Regression for DEF-03). **Preconditions & Steps:** Inspect Day 1 stops on Step 3 of Suggested Wizard.	**Expected:** Stops ordered noon to evening with overnight stay placed at end of Day 1. **Actual & Evidence:** `12:00-2:00 PM` Rohi Cafe → `2:00-5:00 PM` Museo → `5:00-7:00 PM` Thornes → `1 Night · 2 Days` La Casa Prime Cabins (last).	**PASS** High
WTC-16 Suggested Wizard Time Windows (Day 2)	**Scenario:** Inspect Day 2 stop start/end time windows for overlaps. **Preconditions & Steps:** Inspect Day 2 stops on Step 3 of Suggested Wizard.	**Expected:** Stops sorted by start time without overlapping time ranges. **Actual & Evidence:** Sorted by start time (`09:00 AM`, `10:30 AM`, `11:30 AM`), but 2-hr durations overlap (`09:00-11:00`, `10:30-12:30`, `11:30-1:30`, WQA-02).	**PARTIAL** Low (WQA-02)
WTC-17 Suggested Wizard Nearby Restaurants & Hospitals	**Scenario:** Inspect `Nearby → Restaurants` and `Hospital & Pharmacies` tabs in Suggested Wizard. **Preconditions & Steps:** Toggle `Nearby` view on Step 3 and click `Restaurants` and `Hospital & Pharmacies`.	**Expected:** Displays relevant local dining and medical facilities. **Actual & Evidence:** Listed 6 restaurants (*Boss Samgyupsal*, etc.) and 4 medical facilities (*General Tinio District Hospital*, etc.).	**PASS** Medium
WTC-18 Suggested Wizard Nearby Stores (Regression)	**Scenario:** Verify `Nearby → Stores` no longer lists museum *Casa Batik* (Regression for DEF-06). **Preconditions & Steps:** Click `Stores` tab inside Suggested Wizard Nearby view.	**Expected:** Lists only convenience/retail stores; *Casa Batik* is absent. **Actual & Evidence:** Listed *J&B-Convenience Store, Rc Sylvia Store, Maila Store, Alfamart General Tinio, M2 Mc. Oil, Franks N' Burgers*.	**PASS** Medium

Test ID & Module	Test Scenario, Preconditions & Test Steps	Expected Result, Actual Result & Evidence	Status & Severity
WTC-19 Suggested Wizard Save	**Scenario:** Save generated suggested itinerary to local storage. **Preconditions & Steps:** Click `Accept & Save Itinerary` on Step 3 of Suggested Wizard.	**Expected:** Shows confirmation toast, persists trip, and redirects to `/tabs/home`. **Actual & Evidence:** Displayed toast *'Suggested itinerary "Suggested Nueva Ecija Trip" saved successfully!'* and navigated home.	**PASS** High
WTC-20 Custom Builder Setup & Add Stops	**Scenario:** Create custom trip and add 3 stops in `/custom-builder`. **Preconditions & Steps:** Enter title `"Live Website QA Trip"`, 2 days, budget ₱3,000; add *Rohi Cafe*, *Museo de Bongabon*, and *Thornes Samgyupsal*.	**Expected:** Adds all 3 stops to Day 1 and calculates verified budget range. **Actual & Evidence:** Added 3 stops; budget banner showed `₱549 - ₱949 (+ 1 unpriced stop)`.	**PASS** High
WTC-21 Custom Builder Reorder & Remove Stop	**Scenario:** Reorder stops using up/down buttons and remove a stop in `/custom-builder`. **Preconditions & Steps:** Move *Museo de Bongabon* to Stop #1; click Remove on *Thornes Samgyupsal House*.	**Expected:** Updates stop order immediately and recalculates budget range. **Actual & Evidence:** Order swapped cleanly; removing Stop 3 updated budget summary to `₱150 - ₱350 (+ 1 unpriced stop)`.	**PASS** High
WTC-22 Custom Builder Day Management & Off-Grid Venue	**Scenario:** Verify Day tabs (`+ Add Day`, `Delete Day`) and `Add Off-Grid Custom Venue` controls. **Preconditions & Steps:** Inspect Day selector tabs and venue action buttons in `/custom-builder`.	**Expected:** Day tabs switch active day, allow adding/deleting days, and expose custom venue entry. **Actual & Evidence:** Verified `Day 1`, `Day 2`, `+ Add Day`, `Delete Day`, and `Add Off-Grid Custom Venue` controls.	**PASS** Medium
WTC-23 Custom Builder Save	**Scenario:** Save custom itinerary from builder. **Preconditions & Steps:** Click `SAVE / View Full Itinerary / Save Trip` in `/custom-builder`.	**Expected:** Displays confirmation toast and persists custom itinerary in storage. **Actual & Evidence:** Displayed toast *'Itinerary "Live Website QA Trip" saved successfully!'* and persisted trip.	**PASS** High
WTC-24 Saved Itineraries List & Detail Open	**Scenario:** View saved trips in `/tabs/history` and open trip detail. **Preconditions & Steps:** Navigate to 3rd bottom tab (`/tabs/history`) and click a saved itinerary card.	**Expected:** Lists saved trips with badges, budgets, and stop counts; clicking opens detail/builder view. **Actual & Evidence:** Displayed both saved trips and opened full detail/builder view on click.	**PASS** High
WTC-25 Saved Itinerary Deletion	**Scenario:** Delete a saved itinerary from `/tabs/history`. **Preconditions & Steps:** Click trash icon on *Live Website QA Trip* and click `DELETE` in confirmation modal.	**Expected:** Prompts confirmation dialog, removes card, and shows deletion toast. **Actual & Evidence:** Modal asked *"Delete Itinerary? Are you sure..."*; confirming removed card and showed toast *'Itinerary "Live Website QA Trip" deleted.'*	**PASS** Medium
WTC-26 Profile Tab Inspection	**Scenario:** Verify Guest status and sync CTAs on `/tabs/profile`. **Preconditions & Steps:** Click 4th bottom tab (`/tabs/profile`).	**Expected:** Shows Guest Traveler banner and working `LOG IN TO SYNC` and `CREATE ACCOUNT` buttons. **Actual & Evidence:** Rendered Guest Traveler status and both authentication navigation buttons.	**PASS** Low

Test ID & Module	Test Scenario, Preconditions & Test Steps	Expected Result, Actual Result & Evidence	Status & Severity
WTC-27 SPA Deep-Link Refresh	**Scenario:** Browser hard refresh on deep-linked route `/Itinerary-App/tabs/history`. **Preconditions & Steps:** Reload browser directly on `https://edselrenz.github.io/Itinerary-App/tabs/history`.	**Expected:** Loads Saved Itineraries screen with persisted local trips intact. **Actual & Evidence:** Loaded directly into `/tabs/history` with zero 404 errors and preserved saved itinerary state.	**PASS** High
WTC-28 Live Account Creation Mutation	**Scenario:** Submit real account registration form on live server. **Preconditions & Steps:** Skipped per Operating Rule 11 (no unauthorized account creation on live services).	**Expected:** Creates user record and issues JWT tokens. **Actual & Evidence:** Form validation verified in browser (WTC-04); live DB write not executed per Rule 11.	**NOT TESTED** Low

D. Remaining Minor Website Observations (Low Severity)

No Critical, High, or Medium functional defects were triggered during live website testing. Only three Low-severity UX/copy polish items were observed:

ID & Severity	Screen & Component	Observed Website Behavior	Recommended Polish
WQA-01 **LOW**	**Guest Onboarding Copy Mismatch** `/guest` vs. `/tabs/profile`	The `/guest` screen states: *"Your data won't be saved."* However, Guest Mode actually saves itineraries in local device storage and `/tabs/profile` accurately states: *"Your created itineraries and preferences are saved only on this device."*	Update the body copy on `/guest` to: *"Your trips are saved locally on this device. Sign in anytime to back them up to the cloud."*
WQA-02 **LOW**	**Overlapping Static Time Labels on Day 2 of Suggested Itinerary** `/suggested-wizard` (Step 3)	Although Day 2 stops are sorted chronologically by start time (`09:00 AM`, `10:30 AM`, `11:30 AM`), their 2-hour windows overlap (`09:00-11:00 AM`, `10:30 AM-12:30 PM`, `11:30 AM-1:30 PM`).	Compute sequential time slots dynamically (`start_time = max(place_default_start, previous_stop_end + transit_buffer)`) so time windows never overlap.
WQA-03 **LOW**	**Bottom Tab Route/Icon vs. Page Title Naming** `/tabs/history`	The 3rd bottom tab uses route `/tabs/history` and a clock icon (`time-outline`), while the page header inside the view is titled **"Saved Itineraries"**.	Align the bottom tab icon/label (`bookmark-outline` / *Saved*) with the page header **"Saved Itineraries"**.

E. Final Website Verdict

Verdict: ACCEPTABLE — No significant issues identified within the tested website scope.

Reasoning: Following the latest deployment updates on https://edselrenz.github.io/Itinerary-App/welcome, all previously identified frontend defects—including unconfigured social login buttons (`DEF-02`, `DEF-08`), non-chronological Day 1 stop ordering and mid-day overnight stay placement (`DEF-03`), misclassified museum items under Nearby Stores (`DEF-06`), and missing accessibility attributes on map markers (`DEF-09`)—have been verified resolved in the live browser. Discovery search, category filtering, interactive Leaflet mapping, route deep-linking (`PLAN ROUTE HERE`), Suggested Itinerary generation, Custom Itinerary building/reordering/deletion, and SPA deep-link refresh all pass functional QA verification.
